DG 14/75 Intersection Mix	A15E		2.40	40	1955	184.0	1	Wearing	Black Straights.
JOB DETAILS								JOB DRAWING	
We are scheduled for 8 night shifts for this project. We will profile your area the night prior then seal and asphalt it the following night.									
Everyone report to the site office which is located in the bus bay on Scarborough Beach Rd just off West Coast Drive. All of your vehicles can park in there then the paving gear is situated right beside it.									
This project requires the leveling beam and joint matcher to be used every shift unless instructed other wise.									
Please make sure that everyone has their full PPE for night shifts and is on there best behaviour as this is a very high profile job in the public eye. This job has already attracted a serial busy body who reports everything.									
Red Bus bay and red bus lane first then the straights. Roll over your ends and they will get profiled the following night. Areas marked in yellow on the drawings.									
Make sure we are straight edging the mat when we set off paving every night.									
EQUIPMENT									
ITEMS	FLEET No	REGO No	COMMENTS						
Paver	SGA	Super 2003	Wheeled paver
